3.1. Discussion

To use this textbook teacher should encourage students to ask questions and interact, as learning English is not a passive skill. Many of the tasks and exercises involve pair work, group work, and whole-class discussion. Working with others helps students solidify their understanding and challenge and expand their ability to think critically.

Teacher also should personalize the material and help students to make connections between the texts in their book and their own home, community and country. Bring in outside material from local sources when it’s relevant, making sure it fits the unit topics and language.

The instructor who uses this book should provide a lot of practice by having students do each exercise several times, with different partners. Review exercises and material from previous units. Use the Skillful digibook to develop the skill presented in the Student’s book. Students should complete the additional activities on a computer outside of class to make even more progress. Assign frequent manageable review tasks for homework.

Teacher should provide many opportunities for review to remind students of the skills, grammar, and vocabulary they learned in previous units. Students should study a little bit each day, not just before tests.

Learning languages take time and practice. Students must be patient with themselves as they put in the necessary time and effort. They should set and check goals. Periodic assessments the teacher can print, such as the unit tests, progress tests, and end test on the Digibook let students see their own progress and measure how much they’ve learned, so they can feel proud of their skills development.
